Dr. Pierre Kory on His Push to Adopt This Cheap COVID Treatment

Re **Vicki McKenna Show**

Dr. Pierre Kory on His Push to Adopt This Cheap COVID Treatment. Dr. Pierre Kory, Member of the

COVID-19 Critical Care Group, joined Vicki on the Vicki McKenna Show to continue their discussion about cheap, effective treatments for COVID-19 that America has been avoiding adopting in favor of waiting for a vaccine. Dr. Kory and Vicki discuss why he and his fellow doctors are advocating for this treatment so strongly, the benefits of taking Ivermectin, and it's history as not only a safe drug but an incredibly famous drug. Then they go over why America hasn't seen fit to adopt this or any other cheap effective treatment
